This is What Our Latest Bulletin from the Research Branch says—

When prices are high the cost of producing Pork, Milk and Eggs is not so important.
But now only the Dairy, Hog and Poultry men who are cutting production costs are doing business at a profit. Never was there a time when conditions of farm animals was so important.
No time now for milking cows; wormy, unthrifty shoats; or wormy, listless hens.
Our tests prove that the dairyman who will condition his cows with DR. HESS TONIC before calving, so that there is no backset, then continue the tonic to keep their appetites on edge so that there is no milking, can produce milk right now at a profit.
75 per cent. of all Hogs have Worms—Hog Special is given in the feed. No fasting no set back.

Coffee, Luxury blend lb. 45c.
(A delicious Coffee)
Tea, Blue Ribbon, lb. 39c.

Found In Many Parts Of Canada, Limestone Regarded by Geologists As World's Most Useful Rock

Limestone, which is obtainable in more than 1,000 localities in Canada, much of it of fine quality, is regarded by geologists as the world's most useful rock. It is of immense value to man and to all living creatures in a variety of different ways; in fact, there is scarcely a phase of human life in which limestone does not play a part. Calcium carbonate, or carbonate of lime, the principal constituent of limestone, is absolutely necessary for the growth of human beings and animals. It is obtained from eggs, milk, fruit, vegetables and other food products.

To the industrial life of the country limestone is indispensable. The annual production of Canadian quarries, according to the latest available figures is 12½ million tons, which, when made into its primary product, has a selling value of about \$34,000,000. This value is exceeded only by that of coal, copper and gold.

Limestone is used in great quantities in the form of crushed stone for highways, railway ballast and concrete aggregate. It is the principal raw material in the manufacture of Portland cement, and also in the manufacture of calcium carbide and cyanamide, which latter are the bases of many chemical products. The iron and steel industry, as at present constituted, could not exist if limestone were not available to free the iron from its ores. In the production of gold, silver and other metals, lime and limestone play important parts. Quantities of lime are used in tanning leather. Limestone is indispensable to the pulp and paper industry. Every piece of paper is made by its aid. So, too, does the glass industry require limestone for most of its products—particularly for window glass. Limestone is essential to the manufacture of washing soda, baking soda and many other chemicals. Large quantities are used in the refining of sugar. The uses of lime for plaster, mortar and whitewash are generally known. When limestone is pulverized and mixed with linseed oil it is known as putty. Pulverized limestone is also used in the compounding of rubber for footwear and flooring. It is used in oil cloth and in cold-water pipes. Some cigarette papers contain as much as 30 per cent. pulverized limestone. Limestone is a source of carbon dioxide gas which, when compressed into the solid state, forms the refrigerant known as dry-ice, now coming into wide use. A certain type of limestone when melted in a small blast furnace and blown by high-pressure steam into myriads of fibres, yields a fluffy material known as rock wool—one of the most efficient insulating materials on the market.

Many other uses for limestone could be mentioned, but one of the most interesting and certainly the most spectacular use of limestone is its use as a building stone. Canadian limestone for building purposes is notably superior.

Aids To Beauty Cost Millions
Forty-eight factories engaged in the toilet preparations industry. Aids to beauty and cleanliness made in Canada in 1930 in the 48 factories engaged in the toilet preparations industry had a value of \$4,206,513. These aids are listed as toilet creams, hair tonics, face powders, tooth pastes, etc. But not all the toilet preparations milady or men in Canada use are made in this industry. Manufacturers of soap and of patent medicines and pharmaceuticals also make toilet preparations; in fact only about 50 per cent. of what may be regarded as toilet essentials made in Canada are products in the toilet preparations industry. The total production of toilet preparations from all industries engaged in their manufacture had a value in the year under review of \$6,719,986, of which perfume accounted for \$438,869; tooth paste, \$1,756,427 and other toilet preparations, \$4,524,690. Over \$11,000,000 worth of such preparations and perfumes are imported into Canada annually, principally from the United States, France and the British Isles.

Experimenters are trying to recover mercury from a hot spring near the California-Nevada boundary by suspending plates of copper in steam heat that the spring exudes.

Nearly two tons of copper coins were collected by Cambridge, England, students in a one-day drive for funds for ex-soldiers.

Price of book 15 cents.
Price of pattern 25 cents in stamps or coin (cash is preferred). Wrap cost extra.

How To Order Patterns
Address: Winnipeg Newspaper Union, 175 McDermott Ave., Winnipeg

Pattern No. 842 is designed in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust. Size 16 requires 3½ yards of 36-inch material with ½ yard of 35-inch contrasting.

Spring is the most important, the most colorful season in fashion. All the more reason why you should have an authentic guide, such as our new fashion magazine, to show you the way in design, colors, etc. Of course, there are styles for afternoons, for sports, for home wear, lingerie, children, etc.

"Goodness, I believe my hair is beginning to fall out."—Eugenia, Barcelona.

The Uluwatu-Kayser railway in Turkey will be completed in 1932.

W. N. U. 1930

Motor Travel Overseas

Made Very Simple For Those Who Take Own Cars

Ship lines have developed a technique in loading automobiles aboard ship in the last few years which is held largely responsible for the fact that in 1931 the decrease of motor cars carried overseas for travellers was only 26 per cent. from the total for 1930, whereas the decrease in passenger traffic ranged from 30 to 40 per cent. Shipping and automobile men agree that ships moving from New York carried about 5,000 motor cars which were used in foreign countries in 1931.

In about eight years ship lines have advanced from methods of loading which called for the removal of wheels and the crating of bodies. Modern equipment permits a car to roll easily upon a small wooden platform which is grided with steel cable. Platform and car are then hoisted into the air and lowered easily to the hatch. The car is rolled from its platform and loaded to stanchions to prevent its shifting with the motion of the ship.

The steel cables which serve to carry it to the ship do not touch the automobile nor does anything that would mar its appearance. The passenger who takes advantage of the service offered by most trans-Atlantic lines finds his car at the port of arrival with suitable plates attached, gasoline and oil in their place, all customs and insurance details in order and a batch of literature suitably arranged to help him find his way to foreign lands. One motorist wrote to his passenger agent as follows:

"Within one hour of landing at Cherbourg I was on my way. Bags were on the car, papers complete, and I had stepped on the starter. Doubt No. 1 was removed and we were off on our adventure of touring Europe with but little more inconvenience than to cross the Greenwich Ferry for a week-end on Long Island."

The ship lines obtained the co-operation of organizations of motorists and officials of foreign governments in making travel by motor overseas a simple affair. The widely heralded country roads of England have proved an attraction to American motorists with a resultant increase of visitors in recent years.

The motorist who feared for his safety in a foreign country found that France had gone to great trouble to ease his way.

In France, in fact, places posts were erected to indicate the number of kilometers to large cities and signs bearing pictures of locomotives or designs comparable to railroad ties warned of approaching railroad crossings.

Calendars and Trade
Big Legal Holidays Have Halted Of Spelling Week-End Business

We've heard it said that 1932 should be a better business year than 1931. But a short time ago we heard a business man advance the calendar as a reason. Upon examination of the 1932 calendar we understand why this should be a happier year, at least for retail stores, street car companies, newspaper circulation managers, and others who watch the holidays.

The big legal holidays have a monotonous habit of spelling week-end trade in 1931. New Year's Day came on Thursday, Christmas on Friday, and July 4 on Saturday, putting a severe dent in three weeks as far as business was concerned. To the large department store or public utility, holidays falling in the regular business week—from Monday through Friday—mean a real loss in revenue. If all the legal holidays fell on Saturday or Sunday, it would please these businesses.

This year Easter falls on March 22, earliest in several years. Seasonal buying will be advanced, therefore. Labor Day falls on Sept. 5, a week earlier than last year. School will start earlier, than in 1931, which means an advance in the fall seasonal buying, while Christmas falls on Sunday. We talked to one business man who says the 1932 calendar will mean many additional thousands of dollars in revenue for his company.

Manufacturing In Canada
Canada is the second most important manufacturing country in the British Empire. The capacity of Canadian industries and the variety of products marketed are such that many classes of goods, formerly imported, are now being manufactured in the Dominion in sufficient volume not only to meet the requirements of the home market, but also for export.

Canada now sends manufactured goods to almost every country in the world.

Valuable Fuel
In the interior of the Republic of Panama one often sees valuable mahogany being used as fuel in the bonfires, or charcoal burners, doing the cooking for the villagers and planters. Mahogany is cheap and makes the best charcoal, but the Canal Zone authorities are planning to introduce other fuel so as to save the valuable timber.

"Animals," says a naturalist, "don't know how lucky they are." Does a family of rabbits, for instance, realize that they are running about in beautiful sealskin coats.

Spain plans an extensive public works and construction program.

First Target of Japanese

British soldiers shown detaining at the railroad station of Woosung Port, on the outskirts of Shanghai. This fort was the first target of Japanese forces in the move for the occupation of Shanghai. Claiming that they were fired on from the fort, Jap warships shelled the stronghold and silenced it. The British Tommies shown here are defending the international settlement.

Farmers Should Advertise
Sale Of Products Might Be Stimulated By Co-Operative Action

Dr. G. L. Christie, President of the Ontario Agricultural College, who is a close student of agriculture in all its ramifications, and who is in close touch with the farmers all over the province, has provided some food for thought in his suggestion that the sale of farm products might be stimulated by some intelligent advertising.

"If it pays industry to take full page advertisements," says Dr. Christie, "someone should find a way in which newspapers and other advertising mediums can be utilized for the farmers, for it cannot be left to the individual farmer." It is a well recognized fact that co-operative buying and selling among the farmers, fruit growers, etc., has been exceptionally satisfactory, a striking example being the California orange growers. Their policy of co-operation in the marketing of their products, which included advertising on a very large scale, brought results far beyond their expectations, and others have followed in their footsteps.

What has been accomplished in California through co-operative effort that utilized to the utmost degree advertising to sell orange juice and oranges can be accomplished by the facilities afforded by newspaper farmers of this province in popularizing the products they have for sale.

This question is large enough and important enough to arrest the attention of every farmer. It must be admitted that one farmer or even a small group of farmers cannot hope to accomplish much in this direction, but Dr. Christie is right when he points out the possibilities of intelligent advertising and farmers' organizations could do worse than investigate the chances that co-operative effort offers as a means of creating greater sales for farm products.

—Owen Sound Sun-Times.

Belgium Buys 'Planes
Will Soon Have Over One Hundred Of British Design

Military aeroplanes to the value of \$500,000 have been ordered from one British firm by the Belgian Government. The type commissioned has a speed of 220 miles an hour at a height of 13,000 feet. When the final deliveries are made Belgium will own more than one hundred aeroplanes of British design.

Nero's method of amassing wealth was to put rich people to death and confiscate their property.

A government laboratory in Texas has succeeded in producing helium that is 99.99 per cent. pure.

Kept On Advertising
The publisher of a small town newspaper was trying to get the general store owner to advertise:

Merchant: "I've been in this town 30 years and every man, woman and child knows where I am and what I sell. I don't need to advertise."

Publisher: "Is that so? Tell me how long the Methodist Church has been here?"

Merchant: "Fifty years, I believe, why?"

Publisher: "Well, don't they still ring the bell every Sunday morning?"

Unripe apples were recently exposed to a 1,500-watt electric lamp for five days, and scientists watched the development of the red color on the fruit.

NERVOUS PUPIL: "W-why the rope?"
INSTRUCTOR: "Safety First, Sir. If I was to knock you through the window there, it'd be a nasty drop down into the street!"

Suggestion Now Advanced That Western Canada Will Soon Have Reached Wheat Growing Limit

Soviet Architects Are Planning Great Palace
Beautiful Cathedral Being Demolished To Make Room For It

More than a thousand architects, including forty foreign experts, are engaged in drawing up plans for the new "Palace of the Soviets," the gigantic auditorium which is to rise on the site of the cathedral of Christ the Redeemer, now rapidly disappearing.

Ten thousand workmen swarm daily over the mammoth white cathedral, Moscow's largest if not its most beautiful—demolishing the building as fast as they can. The cathedral was built in commemoration of the retreat of Napoleon from Moscow. It held, in its prime, ten thousand worshippers. Today ten thousand ex-workmen are busily removing the last trace of its existence.

Fifteen thousand will find places in the big auditorium. A further six thousand can listen to speeches in the smaller hall, besides there is to be a series of smaller rooms, committee rooms, refreshment rooms and laboratories.

After the general specifications had been completed, a competition was called to enable all architects to submit designs. The competition is still in progress and it is understood highly satisfactory sketches have been received both from Russian and from foreign architects.

The acoustic properties of the main hall are to be in the hands of a group of Americans.

Empire Cabinet
Believe Move Would Be A Valuable Institution At The Present Time

London newspapers have suggested an Empire cabinet, comprising a representative of each dominion and two or three British statesmen, would be a valuable institution at the present time.

The newspapers reached this conclusion in editorials which discussed the appointment of Rt. Hon. Stanley Melbourne Bruce, assistant treasurer of Australia, as "minister representing the commonwealth" at London, England.

Sir John Marriot, noted constitutional authority in an interview said he hoped Mr. Bruce would remain a member of the Australian cabinet during his stay in London. He suggested the addition of Hon. G. Howard Ferguson, Canadian High Commissioner, Rt. Hon. J. G. Coates, Minister of Public Works of New Zealand, and General Jan Christian Smuts, leader of the opposition in the South African House of Assembly, to form the nucleus of a "real imperial executive."

Soviets Use American Skill
Many Workers From United States Employed In Russia

In ever increasing groups, American skill and ingenuity are being utilized by the Soviet Union to work out its industrialization and agricultural programme. The Communist state is importing more and more "technicians" and a large number of them come from America. Miners from the coal pits and from the ore mines, steel workers, carpenters, bricklayers, machinists and railroad men from all parts of the United States can be counted in Russia's army of workers.

Until recently officials estimated that 2,000 American workers were employed in Soviet industry, exclusive of the approximately 1,000 American engineers. Now it is announced that arrangements are being made to receive 6,000 more.

One Explanation
Teacher: "Why did Joseph's brother put him in the pit?"

Boy: "Because he had on a coat of many colors, sir."

Teacher: "What had that got to do with it?"

Boy: "Please, sir, he had on a dress suit they would have put him in the stalls."

It has been stated that the thousands of letters Henry Ford received through the pulp mill for conversion into cardboard which is used to wrap the smaller parts of his automobiles.

Yugo-Slavia may limit its lumber output.

An acre of cabbage requires over 2,000,000 quarts of water in a season.

After Alberta and Saskatchewan reach the point of maximum production there will be a considerable decline just as there has been in Manitoba, Ontario, Minnesota and elsewhere. Dr. MacGibbon concluded.

Where the volume of production will be stabilized in the event would depend upon at least two factors, the very large areas in each province which were better suited to the production of wheat than any other product and the very high quality of the wheat which is produced in these areas.

Czechoslovakia is slashing its expenses.

Wahre Jakob, Berlin.

Lady: "I would like to see an evening dress that would suit me."

Salesman: "So would I, madam."

Wahre Jakob, Berlin.

I.O.D.E.

The next meeting of the I.O.D.E. will be held at the home of Mrs. N. E. Carstairs on Monday evening, next, March 14. Members are requested to bring a guest with them.

WOMEN'S INSTITUTE

Temperance was the theme of a very suggestive and interesting paper read by Mrs. A. French at the regular meeting of the W.I. held at the home of Mrs. R. Saunders on Saturday afternoon. Mrs. J. Craiggen read the March installment of the serial story and Mrs. Cranney and Mrs. Anderson were to prepare the April chapter. A piano duet by Mrs. Saunders and Miss Clara Saunders was much enjoyed. A resolution passed that each member of the Institute send in her favorite recipe to be printed in pamphlet form and sold for 25c. to the members or others who may desire them. Refreshments were served and a delightful social hour spent. Dr. Little of the Red Deer Health Unit will address the May meeting.

LEST WE FORGET CLUB
The regular business meeting of the Lest We Forget Club will be held at the home of Mrs. C. B. Halpin, on Wednesday evening, March 16th at 8 p.m.

REDCAP IN FAIRYLAND
Do not forget the Operetta "Redcap in Fairyland" given by Junior Choir of St. Andrew's Church on Friday, March 11th at 8 p.m. Musical selections will be given in the intermission by local talent. Proceeds are to be used for the purchase of new hymn books. Come and see all the fairies in their costumes. Admission 50c.; Children 25c.

THE CHURCH OF ENGLAND IN CANADA
Diocese of Calgary
St. Cyprian's Church, Lacombe
Rector: Rev. T. H. Chapman
March 13th, 5th Sunday in Lent
11:00 a.m. Morning Prayer.
2:30 p.m. Sunday School.
7:30 p.m. Evening Prayer.
Organist: Miss Kathleen C. Walters, L.A.B.

ADVANCE NOTICES—Confirmation
All prospective Candidates for Confirmation are requested to hold themselves in readiness for the Bishop's visit about the middle of May. Further and more definite particulars later.
Diocesan Summer School at Banff
Monday, July 4th, to Saturday, July 9th, are the probable dates for the summer school this year. Watch for later announcements.

COUNTER SALES BOOKS

Do not forget—March 24th.

11 plate Storage Battery, price \$7.80 at Morrison and Johnston, Ltd.

Out of the ordinary music—on March 24th.

LOOK! General Electric Model S22 Eight tubes, screen grid, Super-heterodyne circuit, eight inch dynamic speaker, 1932 Model Radio. Special trade-in allowance. Get our proposition, Morrison and Johnston, Ltd.

Watch Western Globe next week for news of March 24th.

Rev. P. E. Mundy of the Crescent Heights Baptist Church, Calgary will preach in the Lacombe Baptist Church Sunday, March 13th at 7:30 p.m. All are welcome.

On Friday evening last at about 8:30 o'clock fire broke out in a barn in the alley behind the old Cossy Theatre. The fire was discovered soon after it started and the alarm sounded in record time and had the fire subdued in short order. It was a very still night, hardly any wind blowing, and this fact saved the town from a disastrous fire. Situated where the barn is, immediately in the rear of a large frame structure a high wind would have spread the fire right into the business section of the town. The origin of the fire is unknown.

ST. CYPRIAN'S W.A.
On Saturday, March 12th in the Old Fellows Hall from 3 to 6 p.m. there will be a St. Patrick's Tea, Sale of Work and Home Baking. Irish

potato cakes will be served at tea tables and while having your tea, ask for Free Ticket, it may be lucky.

CAMPAIGN FUNDS AGAIN

Senator Donald Raymond admitted yesterday before the Senate committee investigating Beauharnois allegations that the Liberal party had received \$200,000 contribution from the company as a contribution to the campaign fund. It will be remembered, moreover, that evidence at the special inquiry into the Beauharnois affair revealed that fund contributions were made by the company. The Senate revelation is therefore merely corroboration.

The purpose of the present committee of investigation is to discover the part played in the Beauharnois affair by certain Senators and revelations regarding party fund contributions are incidental. Nevertheless, when the amble of Beauharnois has cleared away and when all the specific allegations have been cleared up, the reflection which Beauharnois has cast upon the Canadian campaign fund system will remain.

The ground has been gone over before. Senator Raymond had no reason to conceal the fact that the Beauharnois Corporation obviously had paid the Liberal party \$200,000 because this form of bribery (in hard word, but a just one) had been an integral part of our Canadian parliamentary system.

The Beauharnois Corporation obviously did not pay this money in a spirit of high patriotism. Such business institutions are not alleged to altruistic practices, and, in any case, it must not be forgotten that money was paid also to the Conservative party. It paid the money because it wanted something which either party could give it if that party was returned to power. The corporation took the trouble of backing both horses.

It is hardly necessary to point out that this is an intrinsically vicious system. Party funds we must have; individuals and private concerns should be free to donate funds to parties they wish to support—but to remove the element of bribery from such support, complete publicity must attend all donations and all expenditures.

G. N. GORDON, EX-M.P. ADMITS MALINGENING BENNETT AND HERRIDGE
OTTAWA, March 3.—Sweeping denials that the honeymoon trip of Hon. W. D. Herridge, Canadian minister to Washington, had been made by both Prime Minister R. B. Bennett and Mr. Herridge on Thursday at the hearing by a parliamentary committee of charges to this effect—allegedly made by G. N. Gordon, the former M.P. of Peterboro, a political meeting in Hamilton on January 6 last.

Mr. Bennett also denied that he had acquired a new private railway car at a cost to the public funds of \$125,000.

Mr. Herridge was married to Miss Mildred Bennett, sister of the Prime Minister, in April last. Reports of the Hamilton meeting appearing in the Toronto Globe, had quoted Mr. Gordon as charging that Mr. Herridge had been in the employ of the Canadian government while on his honeymoon.

A. D. Clarke, news editor of the Toronto Globe, with reporters from Hamilton and Lindsay, were among the witnesses, as well as the prime minister and Mr. Herridge. W. A. Fraser, Liberal member of parliament for Northumberland, was the last witness called when the committee arose at 1 o'clock to meet again Friday morning.

Mr. Bennett would not accept utterances made by Mr. Gordon at a Coughor political meeting on January 16 as an apology. If a real apology had been made he would not

have insisted on an investigation to clear him of the charges. Mr. Bennett said. He had, in reality, been called the equivalent of a "common thief" and with such charges outstanding was not fit to hold office in Canada until he had cleared himself, he said.

"It is untrue," declared the premier, "that I or the government financed my sister's honeymoon trip. It is untrue that I got a new private car for my own use at a cost to Canada of \$125,000. It is untrue that Mr. Herridge was ever employed by me as full or part time legal adviser."

When he went to the Imperial conference he had asked Mr. Herridge to accompany him as his personal advisor, said Mr. Bennett, and Mr. Herridge received no money for his expenses. Later Mr. Herridge had permitted the delegation to defray part of his expenses, but had borne the remainder himself.

The private car being used by the prime minister was not a new one, Mr. Bennett said. When he became prime minister, the car (No. 100) customarily placed at the disposal of the incumbent of that office, had been turned over to him. It was a fine car, said Mr. Bennett, but the accommodations were not quite suitable. It was suggested to him by the president of the Canadian National Railways that, as the latter required a new business car and was planning to build one, there might be some economy in taking over the car of the prime minister for the purpose and preparing another car (No. 102) for Mr. Bennett.

This was done, Mr. Bennett said, and there was no addition to the rolling stock of the railway. Questioned by Mr. Duff, the prime minister said that he had nothing to do with the rebuilding of the car, but he understood it had cost about \$40,000 for alterations and renovating. He had been advised that by the interchange of cars and alterations the railway made a saving of \$8,000, as against the cost of building a new car for the president as had been planned.

Major W. D. Herridge, Canadian minister to Washington, denied the statements of Mr. Gordon. He had gone to the Imperial conference as "personal assistant" to the prime minister, "without salary."

With respect to his marriage trip, he had a brief in a case before the privy council. He was Canadian minister to Washington at the time he made this trip, but he was not in receipt of any salary.

Mr. Fraser said he had taken Mr. Gordon's Cobweb speech as the measure of an attempt for his utterances in Hamilton. He had gathered that Mr. Gordon had discovered himself to be in error and had made a retraction.

DEBT EXPANDS LIKE MUSHROOM
The sudden collapse of the budget debate in the Alberta legislature, without the premier or the provincial treasurer offering any reply to the vigorous criticism of the government's financial record from the opposition benches, has attracted much attention. It is the usual procedure for the head of the treasury to defend that record and for the premier to undertake an extended survey of the financial situation. Instead they took refuge in the declaration that further discussion could take place in the comparative seclusion of the committee room.

In so doing they displayed an unwillingness to discuss finances, the most important subject before the legislature this session. The people of the province would like to hear a convincing justification of the tremendous increase in the debt of the

province in the last ten years. In his recent budget statement, Mr. Reid said that the funded and unfunded debt on December 31 last amounted to \$188,178,000. At the end of December, 1920, the amount was \$114,761,000.

In his budget speech in 1924, Mr. Reid presented statistics on the provincial debt from 1908 onward. In 1921 when the Premier's Commission took office, the debt was \$77,453,675. By 1924 this had been increased by \$19,448,269, making a total at that time of \$96,901,944. Now it is \$133,476,000, or considerably over double what it was in 1921. In addition is an indirect debt of \$11,000,000.

The premier and the treasurer should have availed themselves of the budget debate to explain this alarming and continuous increase in the province's indebtedness and to give details showing why there was a jump of about \$18,000,000 during the year 1931. If they had done so, it is just possible they might have made clear why the government is compelled to resort to higher taxation in such serious times.

PERHAPS MALONEY CAN EXPLAIN

It has always been a mystery to us why J. J. Maloney, self-styled ex-cleric of the Roman Catholic Church, is attempting to organize a following under the name of the Ku Klux Klan, of which he says he is the head in Alberta. Maloney, and everyone in Alberta is aware that the Ku Klux Klan left a trail of slime across the United States from coast to coast, and at the present time has reached such a state that law-abiding citizens would be ashamed to acknowledge any connection with it. Its leaders are in penitentiary for crimes ranging from kidnapping to the murder and debauchery of women. It is an organization that stinks in the nostrils of decent people, and we are surprised that some citizens of our Province see fit to join its ranks. However, we think that our citizens are too honest to let this organization get very far, and Maloney will have to be content with the few initiation fees he has already been able to collect among certain elements.

LINCOLN NEWS

Mr. C. M. Carter and son Floyd, of Camrose are visiting friends and relatives in our neighborhood.

The stock held at the home of Mr. and Mrs. D. Wilson and presented there was another example of the ladies had a real success with their Leap Year dance on Feb. 26th. The hall was crowded. Mrs. R. Kinley made an excellent M.C. Bill Dool and Harry Taylor were in their best in calling the square dances.

Morebrook Social Evening Club are having a Masquerade dance in Lincoln Hall at March 17th. Prizes will be given to best-dressed couple and also to best comic.

We regret to report Mr. O. J. Johnston is illing and under doctor's orders. All join in wishing him a speedy recovery.

Skin Loveliness

Easy to Have. Famous Vegetable Pills Better than Creams.

Miss E. T. has proved it. She says: "Carter's Little Liver Pills will do more to keep the complexion clear than all the face creams I have used."

PURELY VEGETABLE, a gentle, effective tonic to both liver and bowels. Carter's Little Liver Pills are well out equal for correcting Constipation, Acidity, Bilemness, Headaches and Indigestion. 25c. & 75c. pkgs. everywhere. Ask for Carter's by NAME.

Week-end trips, so popular last year on Canadian Railway lines, will remain in force this year after February 29 the date set for their discontinuation. The Canadian Passenger Association has reached this decision under pressure of public demand. Under this arrangement, round trip tickets between any Canadian stations for any week-end are offered by the railways at the rate of one and a quarter times the regular single fare.

Two Alberta speed-skating records were smashed at the recent Banff Winter Sports Carnival. The 220 yards event was won by A. E. Hardy, of Saskatoon, in 29 seconds flat, 4-6 seconds better than the former Alberta record. The Three mile event was also won by Hardy in 9 minutes and 2-6 seconds, being 23 and 3-6 seconds less than the former Alberta record. Miss Margaret Nicol, of Drumheller, was elected Carnival Queen and will reign over the Banff Winter Sports Carnival of 1933.

Travelers in Canada at Easter-tide will have the benefit of the same ticket privileges as were granted them at Christmas, according to a recent announcement made by the Canadian Passenger Association on behalf of the Canadian Pacific and Canadian National Railways. This concession will be in force and a quarter for round trip generally to the travelling public between Thursday, March 24 and Sunday, March 27 with return available up to Tuesday, March 29.

Fifty-seven 10-year leases of salmon and trout fishing rivers, lakes and streams in New Brunswick will be put up for public auction at the Parliament Building, Fredericton, April 7 next, at upset prices ranging from \$100 to \$12,000 per annum, is the announcement of Hon. L. P. D. Tilly, provincial Minister of Lands and Mines. They represent the pick of salmon fishing facilities on this side of the American continent.

THE HORSE SALE
Lacombe's 9th Annual Horse Sale held on Tuesday last, was one of the best held here, 217 horses being sold at an average price of \$62.45. The highest price team sold for \$246.00, while the highest price for a single horse was \$160.00. The entry list for the sale, and shows that horses are getting more scarce every year. The horses entered this year were all good ones and the prices received were encouraging.

AT THE AVAION

Evening clothes, topper, cane, boutonniere; not the Prince of Wales, but the Prince of Good Humor, Will Rogers, and that's just what he wears in this new Fox picture "Young As You Feel." But don't laugh now. Save your giggles, because you're going to need every one of them when you see Rogers change overnight from an old duck of the stock yards to a modern playboy of the night clubs. He's more mirth provoking than ever and he'll shake you loose from your last titter.

If you thought Will was funny in baggy trousers, or in his galvanised derby, wait till you see him in spats. And wait till you see Fifi Doreau and Lucien Littlefield who head the strong supporting cast, which also includes Donald Dillaway, Terrance Day, Lucile Browne, Rosalie Roy, C. Henry Gordon and Brandon Hurst among others.

COMING: Wm. Haines in "Get Rich Quick Wallingford," Mar. 17, 18 and 19.

Helen Hayes in "The Sin of Madelon Caludet," Mar. 24, 25, 26.

There will be a dance in Spruceville Hall on March 16. Morton's Orchestra will furnish the music.

BLACKFALDS

The interest in the Fiddler's Contest is growing as was manifest by the capacity crowd at the Community hall on Friday night, Feb. 26th. There were nine contestants for the honors of the evening: Mr. Brandt, of Inisfail, Mr. Jevne, of Wetaskiwin, J. Clark and T. Clark, of Canyon, Cameron Fraser, A. Gibson, J. Holloway, J. N. B. McDonald, Dan Todd, of Lacombe and District. The following men were chosen as judges: R. Rhind, T. Wilkes and Mr. James. Sp. Before giving their decision, the judges asked Messrs. Fraser, Holloway and Jevne each to play a waltz. Mr. Jevne was declared the winner of the contest and was presented with a beautiful Auto Rug. Mr. R. Rhind's story and Irish songs were greatly enjoyed, as well as the comic skit "How Time Flies" by Messrs. Rhind, Wilkes and Dwan. The local Committee already are planning for a better Contest next year and are proposing to add to the "Fiddler's Contest" another contest for the modern Violinists.

The vendor is informed that there are upon the said lands the following improvements:

Dwelling House \$1620.00
Shed 30.00
For further particulars and conditions of sale apply to J. S. McCormick, Solicitor for the Plaintiff herein.

DATED at Lacombe, Alberta, this 1st, day of March A.D. 1932.

ST. ANDREW'S CHURCH NOTES

The regular meeting of the Women's Missionary Society will be held at the home of Mrs. Dowling, on Tuesday, March 15th at 5:00 p.m. The Mission Band will meet immediately after Sunday School on Sunday, March 20th.

The Young Women's Auxiliary are holding a supper meeting in the Club Rooms on Tuesday evening, March 16th.

The Easter Thank-Offering meeting will be held on Monday evening, March 28th. Outlying W.M.S. Auxiliaries are expected to be present to hear Dr. Margaret MacKellar, an outstanding missionary woman, who will be the speaker on that occasion.

Dr. MacKellar will also be the speaker at the Presbyterian to be held at Wetaskiwin, on March 29th. Anniversary Services will be held on Sunday, April 2nd, to commemorate the founding of the church in Lacombe, and on Monday evening an Old-timer's supper will be served by the Ladies' Guild. Special speakers are being obtained for both morning and evening services on Sunday and for the banquet on Monday evening, and much interest in the affairs is being taken by those old timers who were in Lacombe in the early days.

WILL HE COME TO LACOMBE?

J. J. Maloney's advance man was in town some time ago and made arrangements for the appearance of that gentleman in Lacombe. Something has gone wrong with the arrangements apparently, as the dates of his talks have passed. If he does come here, we would like some one in the audience to get a statement from him giving the name of the R.C. College at which he received his education before becoming an "Ex-Cleric," and tell them the true reason he did not finish his career. It will be most interesting if he will tell the truth. But, then, he may not come here—and as to telling the truth—?

Bentley News

There will be a Whist Drive at the home of Mr. and Mrs. H. P. Hansen, on March 11th, proceeds for the hospital. Admission 25c. Ladies please bring lunch.

The Whist Drive at the home of Jake Whitworth was a big success. The prize winners were as follows: Ladies' First Prize, Mrs. F. Ellisworth; Ladies' Consolation, Mrs. Wetherall; Men's First, Percy Wilson; Men's Consolation, Fay Johnson.

Miss Alice Blaikie was in Edmonton over the week-end visiting her mother, who is a patient in the University Hospital.

Mrs. Page spent the week-end in Edmonton.

The Bonspiel is in full swing, and the finals will start on Wed. night.

Mr. and Mrs. C. Hergott spent the week-end in Calgary.

Miss Gwen Halpin, R.N., resumed her duties at the Bentley Hospital.

Mr. and Mrs. Wetherall went to Edmonton on Sunday, and will be away for a few days.

M.D. Lorne 400 will hold their regular meeting on March 14th, at Bentley.

Born at the Bentley Hospital, on March 6th, to Mr. and Mrs. Ponto, a daughter.

Born at the Bentley Hospital, on March 4, to Mr. and Mrs. H. Staples, a son.

Mr. Houston, of Leduc, is a patient in the Bentley Hospital.

Joseph Solberg is a patient in the Bentley Hospital.

A surprise party was held for Chas. Garries, who was celebrating his 21st birthday. The party was held at his home in Bentley. He received many nice gifts, among them a club bag, given to him by the men.

Miss Lily Gyori is at the home of Mr. E. Evenden.

Dr. Hyman, of Lacombe, was in Bentley on a case at the Hospital, on Sunday.

The Annual Curlers Service will be held at the Church in Bentley on Sunday. The curling club of Bentley will attend in a body.

LOST—in Bentley Hockey Rink, 1 pair Hockey Gauntlets. Finder please return to R. Kannegger, Lacombe and receive Reward.

ACTS TWO WAYS AT ONCE

WORLD HAPPENINGS BRIEFLY TOLD

It would cost \$2,193,000 to construct the Mackinac Island Ferry, the Hudson Bay Railway, the House of Commons was informed.

More than \$10,000 has been raised by Calgary Chinese to aid their brethren in China defend the nation against the Japanese.

Immigration from Canada during 1931 dropped 77.1 per cent. compared to the previous year. A total of 31,877 Canadians were admitted.

Ferdinand Edouard Buisson, 91, long a noted writer against war and holder of the Nobel prize, died a short time ago at Beauvais, France.

The list of three royal air force aeroplanes, forced down in a blizzard in the Syrian desert, was found north of Intan, with all the occupants safe.

There are more than 100 candidates in line for the 10 travelling research fellowships to be awarded this spring by the Royal Society of Canada.

The shipping world understands a situation has developed favoring a profitable deal with Canada whereby Great Britain would exchange British coal for Canadian wood.

Mayor Davidson has been informed the Royal Canadian Mounted Police force will not police the city of Calgary. This will be up to the city police force.

An autographed letter written by Lord Nelson to the lords of the admiralty five weeks before his death when auctioned recently brought about \$100.

Dr. Hugo Eckener announces the Graf Zeppelin would make four trips to South America during March, April and May. Six other trips, as yet undesignated as to termini, are planned.

Demolish Famous Structure

Waterloo Bridge, spanning Thames in London, England, To Be Replaced

Old Waterloo Bridge, still one of the finest structures of its kind in Europe, is doomed to demolition.

The London County Council has voted to demolish the bridge and erect a new one nearby. The decision marked the end of seven years of controversy, complicated by the fact that expert opinion was divided on the feasibility of its preservation.

For more than a century Waterloo bridge has gracefully spanned the Thames. But it is apparent even to casual observers that it is very slowly sinking. It is the oldest bridge now standing within London, and is the work of John Rennie. A massive stone structure of nine arches, carrying a level roadway, Waterloo Bridge was opened in 1817, and its capital cost was \$252,000, more than that of any other important London Bridge.

Sir Gilbert Scott, architect of the great Anglican cathedral at Liverpool, has been asked to design a new bridge to carry six lines of vehicular traffic, and to cost \$1,295,000. The ministry of transport will assist the county council to the extent of contributing 60 per cent. of the cost.

Gift For Universities

Canadian universities and colleges have been offered \$125,000 by the Carnegie Foundation of New York for purchase of books of special interest to undergraduates. E. C. Kite, librarian of the Douglas Library, Queen's University, announced. The sum will be divided among Canadian colleges and universities in a fixed ratio which depends upon age, equipment, attendance and other qualifications.

Ontario Gold Production

Gold production in Ontario during January, although lower than in December, 1931, was in excess of average monthly production for the past three years, according to a report of the Provincial Department of Mines. Output showed an increase of about \$400,000 over January, 1931.

A comparison of the smoke in the air of London and New York has been made, and London smoke particles were found to be smaller in size.

VARICOSE VEINS

W. N. U. 1930

Extend Library Privileges

Public Library Commission For Saskatchewan May Be Established

Establishment of a public library commission for Saskatchewan, with the commission to be charged with the administration of the Carnegie Institute, is a development which may be expected in the near future within the best of all hopes.

Recently, representatives of the Carnegie Institute, Regina and members of the provincial government, met to discuss the consideration of now being given to a plan which would bring to the residents of all Canadian provinces, book-lending system not possible at present.

The plan, it is learned, provides for a substantial financial grant from the Carnegie Institute to the province, controlled by a commission in charge of the library extension work. This commission would work in co-operation with the open-shelf library and travelling library branches of the provincial public service, and the system would permit the distribution of books into every rural section of the province.

May Bring Price Down

Northern Canada Able To Supply Medium In Large Quantities

Northern Canada will give to the world within the next two or three years so large a supply of radium as to materially decrease its price and give small quantities of it to many medical institutions which now cannot get it at all, Hugh S. Spence, of the Canadian Department of Mines, said following an address he delivered before the American Institute of Mining and Metallurgical Engineers at New York.

His address gave details of recent discoveries of pitchblende, the uranium ore from which radium is derived, in the region of Great Bear Lake, 12,000 square miles in extent, near the Arctic Circle.

By Annette

FRIEND HUSBAND IS ALWAYS ATTRACTED TO HOME FROCKS WITH TRIMS OF FRESH

And this one is quite a darling. It wraps the figure, and hugs the waistline. A soft narrow sash slips through a button opening at the right side, leaving the front free in panel effect, which flatters the height of the wearer.

The ruffling may be bought already to sew on, if you like. However, the pattern provides for same. A novelty cotton with woolen aspect in orange-red shade with white pique trim made the original.

It opens out flat so is extremely easy to launder. Style No. 943 is designed for sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust. Size 36 requires 3 1/2 yards of 35-inch material with 1 yard of 35-inch contrasting.

Subs, rayon novelties and cotton corduroy are lovely to fashion it. Spring is the most important, the most colorful season in fashion. All the more reason why you should have an authentic guide, such as our new Fashion Magazine, to show you the way in design, colors, etc. Of course, there are styles for teenagers, for students, for home wear, lingerie, children, etc.

Price of book 15 cents. Price of pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Churchill Is Optimistic

Premier Time Not Sunset But Dawn For British Empire

Mr. Winston Churchill stopped packing up and down the small drawing room in the British Embassy, Washington, took his cigar from his mouth, and concluded an interview with Canadian correspondents, saying: "I do not think this is sunset for the British Empire—it is dawn!" He slipped his words.

Mr. Churchill, however, as he said, recovered from his blithe exclamation. "New York," he declared, certain. "The forthcoming economic conference he described as a great chance, far the best ever had and if thrown away, presently the only one."

"I do not think it will be of substantial results," he said. "It is obviously the important thing to put a ring fence around the Empire, even if it is a very high one, to make the Empire economically self-sufficient."

The imperial tendency, he continued, had been to undo the old ties. Centrifugal force had been too long in play and it was now time that centrifugal tendencies should act. Operating through tariffs and preference they should give a greater cohesion.

"The British quota on wheat, he assumed, would be just as effective as if achieved by a duty. The question would be what reciprocal privileges would be given to British manufacturers."

As to immigration to Canada the population should be of British blood and not given over to the Doukhobors. "We should not have much chance for sale of our woolen goods in that country," he said, smiling. There was nothing more important than the preservation of the old blood.

Harnessing the Wind

Principle Of Rotor Ship May Be Used To Generate Electricity

The rotor ship having no engines, and propelled by revolving towers, which was tested a few years ago, did not become popular, even though it worked. Now, a new application of this remarkable principle has been found. Great rotors are likely to be erected to drive dynamos which will generate electricity. One of them is being put up as an experiment to determine the amount of energy that can be harnessed in this way. If it is successful, a great plant is to be built, consisting of forty rotor units, each of which can generate a thousand kilowatts when the wind is blowing at twenty-eight miles an hour. It may be that in the rotor science has at last discovered the real secret of harnessing the winds, which can provide mankind with almost unlimited power.

The Ownership Of Trees

Classed As Real Estate Of Town Or Village

Who owns the trees that flourish on the streets or on the roads of a municipality? They are the real estate of the town or village or township, and as such may not be disposed of by the ipse dixit of a councilman, nor by the whole council except under the strict rules that are laid down for the disposition of public property. Trees may improve the value of property along a street so that the owners would receive a distinct loss by their removal. The laws of England, of most of the states of the United States, and of Canada give protection to the owners in such a case. Of course, trees may be removed for an important public reason.

Land-Locked Nations

Fifteen Have Not Even a Corridor To The Sea

There are 15 nations which have no sea coast. They are landlocked people. They have not even a corridor to the sea. They become wholly landlocked in their thinking and living. They have not before them that boundless, living, restless, ever-changing immensity, symbolized by the sea, to touch their souls with the dust of adventure, the lure of the unknown, the magic of alien shores.

Once Thought Valuable

Osmiridium, a rare metal used for fountain pen nibs, was occasionally found associated with gold, and miners used to throw it away. It now sells for \$63 an ounce and the miners see a point in keeping it.

The lowest point of land is the Sea of the Dead Sea in Palestine, 1,290 feet below sea level.

WIFE OF NEW TIGHT ROPE WALKER (who is practising): "I can't bear to look!"

MANAGER OF CIRCUS: "It's keeps saying 'I shan't fall—I shan't fall,' then 'we won't fall.'"

WIFE: "Yes, but Joe's such a liar!"—The Humorist, London, England.

Highway From England To Turkey Planned

Governments Of Eight Nations Operating In Enterprise

A 1,937-mile new highway is to be constructed extending from London to Constantinople, along which it will be possible to drive a motor car the entire distance unhindered by the host of restrictions now imposed.

The Automobile Association of Great Britain has just published details of this enterprise. The motorist of the future, setting out from London will reach Dover, 70 miles distant, and crossing the channel, will resume his tour at Calais, 95 miles from London, then to Brussels (234 miles), Belgrade (1,242 miles), Cologne (369 miles), Budapest (1,092 miles), Sofia (1,587 miles), and then on to Constantinople, or, as it now must be called, Istanbul.

The governments of eight countries are co-operating in the scheme in order that touring motorists can pass along without customs checks. At each frontier post along the route there will be garages permitting repairs to be made and spare parts bought of every make of car.

Each bureau will be staffed with expert guides so that no motorist need lose his way. Moreover, there will be ample medical supplies and gasoline stations.

Each of the eight countries through which the route passes is vying with each other in its zeal to make the wonder road of miles of it are yet to be constructed. New and stronger bridges are being built, and in the case of ferry crossings is to be modernized. The authorities in each country are being urged to make the road a uniform width of 30 feet.

Plans are being drawn up for extending the road through to Calcutta, via Aleppo, Damascus, Baghdad and Teheran, Meshad and Dushanbe, to the Gulf of Persia, to Lahore, and from there to Delhi and Calcutta.

An automobile association official said: "We are now negotiating for a 24-hour customs service in the eight countries concerned, and for customs departments to be established on the actual road at the various frontiers through which it passes."

"When the international road is an accomplished fact it will be possible to set out from London and cover the entire 1,937 miles carrying only one document and paying only one deposit."

The government will accept letters from abroad in the old name until this fact becomes known throughout the world, but telegrams must be addressed to Istanbul, or the French name Stamboul, which is incorrect.

Praise For The Newspaper

Makes Millions Of Statements But Commits Few Errors

Fraser Elliott, solicitor for the Dominion Income Tax Department, says: "I disagree with the statement of ten made that 'nothing can be believed which is seen in a newspaper.' Our newspapers over a long period of time have established, I believe, a reputation for integrity and fair dealing. That oft-referred 'infinite capacity for taking pains, may be applied to newspapers on past evidence of few errors in the million of statements made. It is an infinite capacity for gathering and recording the facts in an incredibly short space of time, for the facts of today, in any part of the world, are news tomorrow in any other part of the world, but history the next day. Newspapers are not published or sold successfully as histories."

Chocolate Macaroons

1 cup sugar.
1/2 teaspoon salt.
2 egg whites, stiffly beaten.
1 1/2 squares unsweetened chocolate, melted.
1 teaspoon vanilla.
Combine sugar and salt. Fold gradually into egg whites. Fold in coconut, chocolate, and vanilla. Drop from teaspoon on greased baking sheet. Bake in slow oven (275 degrees Fahrenheit) 30 minutes. Makes 2 dozen macaroons.

People Have Been Kind

Desire To Help Very Pronounced During Hard Times

Nothing has been so heartening and helpful throughout this period of depression which is now beginning to lighten, especially in these later stages as a new spirit which seems to be abroad in the land. Difficult to define in words, it is felt by all. Partially described by such terms as co-operation, "kindness," "understanding," it includes something more—unity of thought and action for the common welfare which has never been so marked in previous visitations of hard times.

Discharged Maid—You described me as dishonest to that lady, I cannot find words to express my indignation.

Ex-Mistress—"And we can't find four pairs of silk stockings and three tablecloths."

Where Pawnshops Prosper

Business is livelier than in some years at the pawnshops in Prague, Czechoslovakia, where pawnbroking is a government function. On the average 36,000 objects are being pawned monthly for about \$150,000, while articles valued at about \$120,000 are redeemed each month. Unredeemed goods have in the two government pawnshops are valued at nearly \$1,000,000.

Safety First

It is announced that only one passenger out of 101,597,000 carried on Canadian railways was killed in a railway accident in 1931, and but one in 9,000,000 was injured. Here is a feature in which the railways can compete successfully with airplanes and motor buses which are cutting into their revenues. After all safety comes before speed or comfort.

Rickets Cure Announced

A new cure for rickets was announced recently by Professor John W. M. Bunker, of the Department of Biology and Public Health at the Massachusetts Institute of Technology.

Prices of cotton yarn topped all records in India last year.

BBY'S OWN SOAP

It's Best For You—Baby too

Completion Of Old Experiment Is Near

Scientists Working On Correct Measurement Of Speed Of Light

Astronomers measure the distance from the earth to stars and planets by it, using "light years," the distance light would travel in a year. But they have never been able accurately to reduce a light year to miles.

Galileo, Italian scientist, made one of the first estimates of light's speed by flashing lantern light back and forth across hilltops. Employing much the same principle, Dr. Albert A. Michelson, United States physicist, used mirrors to flash light from mountain top to mountain top near Pasadena in 1927 and found it travelled 186,284 miles per second. This value was accepted by scientists, but Dr. Michelson felt a still more accurate measurement could be made.

He had a mile long tube of corrugated steel 36 inches in diameter built on the Irvine ranch near Santa Ana, California. It was sealed, reduced to a near vacuum and light from an arc lamp flashed back and forth through it by mirrors. But Dr. Michelson, who was 70 years old, died last May before the first five of his observations were completed.

Dr. F. G. Pease, of Mount Wilson Observatory, and Fred Pearson, of the University of Chicago, who had aided him, will resume the observations and hope to complete them within a comparatively short time.

Canada's Wheat Exports

Summary Of Movement Of Grain To United Kingdom Given In Report

Wheat exported during the month of January totalled 9,472,346 bushels, valued at \$5,817,082, compared with 9,609,962 in January, 1931, valued at \$6,430,682, according to a report issued by the Dominion Bureau of Statistics. The amount sent to the United Kingdom was 5,288,568 bushels compared with 5,818,988 bushels in the corresponding month of last year.

In the six months ending January, 1932 the total wheat export was 104,450,432 bushels, compared with 138,297,729 in the same month of 1931.

"Wheat flour export in January totalled 331,896 barrels valued at \$1,171,870, compared with 392,256 barrels at \$1,558,509 in January, 1931. The six months export was 2,896,805 barrels at \$9,970,107, compared with 3,961,694 at \$17,714,234 in the same period a year ago.

An Interesting Discovery

Petrified Apples Have Been Found By Farmer In Alberta

While fossilized palm leaves, figs and fig leaves have been uncovered in southern Alberta, as proof that about 70,000,000 years ago this part of the west was a tropical land where the dinosaurs roamed, yet it was not until last month that petrified apples have been discovered.

This discovery was made by a farmer digging a well in the Olds district, who unearthed petrified apples on a petrified branch of the ancient tree. The Calgary museum has been notified of the discovery and the well has been refilled with earth to await further excavation work by experts in this branch of research.

Captain Kidd, the pirate, was sent out from England to capture pirates and turned pirate himself.

Cut Down Food Wastage

Investigate Radio Broadcasting

Parliamentary Committee To Be Established For This Purpose

Equipped with wide powers, a parliamentary committee will be established to investigate the Canadian radio broadcasting industry, Premier R. B. Bennett announced, to the House of Commons. It will "advise and recommend a complete technical scheme of radio broadcasting for Canada so designed as to ensure from Canadian sources as complete and satisfactory a service as the present development of radio science will permit," and will "investigate and report on the most satisfactory agency for carrying out the scheme."

Advocate of public and private ownership will be afforded opportunity of presenting their views before the committee, the premier said. Review will be made of the report of the Aird Commission which investigated the radio industry in 1929, and among other things, advocated nationalization of broadcasting.

Members of the parliamentary committee will be selected from among the various parties in the House, the actual selections being left to the whips. A similar committee was established during the 1930 session, but it held no meetings because of the sudden prorogation of parliament on the eve of the general election.

An Ingenious Farmer

Rigged Up Automobile Engine To Generate Electricity For Home

Fred Hranac has put the wind to work and now his little farm home near Coaldale, Alberta, is bright and cheery at night.

Hard times hit Hranac's farm. Long ago he quit using his old model automobile. He couldn't afford gasoline and he couldn't afford kerosene for lamps. The only thing in abundance was wind and time.

Time brought ideas. One bore fruit. Hranac constructed a foundation, shoved his old automobile out of it, kept the chassis free and greased the engine. A mower wheel with paddles of light materials—like a windmill—was attached. The wind propels the mower wheel which in turn drives the generator, which charges a dozen old wet batteries which he collected, with electricity.

Enough current is derived to light his house and barns and bring more than a spark of cheerfulness where darkness reigned after sundown.

Scientists Are Busy

Scientists of nearly a score of nations are completing arrangements for the widest investigation ever made into the scientific and meteorological mysteries of the polar regions. The second "polar year" begins August 1 next, and a group of "weather men" in Toronto are toiling daily to conclude details of the great part Canada is to take in the new invasion of the top of the world.

There were 8,015 saloons in New York City before prohibition.

A. M. CAMPBELL'S**GORDON RESORTS TO****MOTH-EATEN ALIBI**

Hon. G. N. Gordon, former deputy speaker of the House of Commons, resorted to an ancient refuge to clear himself of trouble in connection with sensational charges reported to have been made by him against Premier Bennett and his brother-in-law, Hon. Mr. Herried.

Before the House of Commons inquiry he claimed his statements had been misconstrued. Mr. Gordon, in a political speech in Hamilton, on January 6 last, was reported by the Toronto Globe, a very accurate and responsible newspaper, as charging that Mr. Herried had been in the pay of the Canadian Government as legal adviser, and was appealing a case for the government before the Privy Council during the time he was abroad on his honeymoon. He also was reported on the same occasion as asserting that Mr. Bennett had spent \$125,000 of the public funds for a new private car when he assumed office. Both the prime minister and the Canadian minister to Washington entered a categorical denial to these charges on oath.

Mr. Gordon, a prominent Liberal was asked to prove these charges before a special committee appointed by the House of Commons. Placed on oath, he attempted to crawl from under by placing the blame on Toronto Globe reporter. He testified on oath that his statements had been mis-reported by the Globe, and, further, he had discovered his facts to be misleading.

We are quite willing to leave the question of reportorial veracity to be settled between Mr. Gordon and the Globe, but beg leave to quote a statement made about a year ago by Viscount Peel, an eminent British statesman not unknown to Canadians. He toured the Dominion three years ago as chairman of the British Parliamentary Union. His Lordship's tribute to the press is commended to the attention of Mr. Gordon and others of his ilk:

"I have never once, in the whole course of my life, complained of the accuracy of any newspaper reports of my speech. . . . The only things I have complained of are my feelings next morning when I read what I had said, and still later when I heard the remarks people passed about what I had said. No gentleman there is nothing about the press that has ever got me into trouble so much as the accuracy of their reports of what I have said."

THEY'RE SICK OF MALONEY

Reports from all parts of the Province where J. J. Maloney (the guy who advertised himself as an ex-cleric of the Roman Catholic Church) give ample evidence that all is not

going well with that Gentleman (?) It has taken the people who have attended his meetings a little time to get wise to him, but he has been circulating such barefaced lies, that some of his hearers have made it their business to check up on some of his statements.

At meetings held in the northern part of the Province this pseudo ex-cleric read a statement (in the Maria Monk) from a young woman to the effect that she had been a member of the Precious Blood Community, and containing salacious allegations against the Sisters and ridiculous statements about her treatment.

"As Mr. Maloney must have known (if he investigated, as we did), the fact is that this woman was never a member of ANY religious community, but was placed as a ward of the government in the Corrective Class of the Good Shepherd Institution. Mr. Maloney must have known of this fact, and demonstrated malice in ignoring it, and showed plainly that his statements are not worth the attention of honest people."

A northern contemporary has written to say of Mr. Maloney: "Mr. Maloney has just worked out an ingenious system by which he can swing up and down the country and was rich at the expense of the public." The writer calls upon all intelligent and fair-minded Protestants in every community, "to rise as a unit and free the public from this gangrenous parasite."

WHAT THE GATEWAY EDITOR SAYS

The editor of "The Gateway," Alberta University paper, article on J. J. Maloney with the following remarks:

"The 'Orator's' oratory is an example of strong assertions without proof and declamation without argument, of conceit without dignity or moderation, with neither correctness nor judgment in the design. Our country is at present involved in many dangerous difficulties, we are beset with economic problems which demand the co-operation of every citizen and of every class of the community—if there is one thing that will extricate us from our present plight, it is unity and solidarity. A man who in times such as these seeks to set sections of the community at variance with one another, who seeks to disrupt society by inflaming it with lurid and fictitious scandals and to arouse hatred by means of malicious generalizations based on utter lies, is nothing more than a demagogue and a danger to society."

CANADIAN WILD BOAR

PLOW SHARES

FARMERS

You will save Time, Trouble and Money by Using only Wild Boar Plow Shares. An entirely new idea has produced this all-hardened, self-sharpening Plow Share that has been thoroughly tested and tried under all conditions. These shares are particularly adapted to heavy and stony land.

It will last twice as long as any soft plow share manufactured. The next time you are in town drop around and see them. We have them for any make of Plow, also for Breaker plows.

FARM WANTED TO BUY

Party wants quarter section in Lacombe District west, that can be purchased for \$10.00 per acre or thereabouts. Give full description in first letter. Address "Advertiser," in care of Western Globe, Lacombe.
